News & information from Ahlberg Cameras – September 2024

PROJECT UPDATE: CCTV SYSTEM AT RNPP, UKRAINE

## Ahlberg Cameras, in partnership with Energy Safety Group, has delivered a new CCTV system to the Rivne 2 reactor in Ukraine.

Installation began September 9<sup>th</sup>, with commissioning set for late September. This system integrates with our existing CCTV at Rivne 1, improving monitoring across both reactors and surrounding areas. Ahlberg's systems at Rivne 1, 2, and 3 support the plant's lifetime extension programs.

**Our thermal cameras play a crucial role in identifying potential leakages or machinery issues early, ensuring safety and preventing breakdowns.**

Ahlberg Cameras' T-Complex video management system that is used is very flexible and it enables the operator to manage all cameras throughout a nuclear plant. It is designed to meet true enterprise requirements around the globe. It is based on field-proven technology elements, which are used by many customers in projects worldwide. Thanks to its open architecture, it enables advanced integrations with a wide variety of third-party systems to maximize the outcomes of your physical security ecosystem.

Stay tuned for updates and read more about results from this case.

TUNZINI MAINTENANCE NUCLÉAIRE

## Successful 4-FACE Inspection during Offload at Chinon NPP.

Tunzini states *"that they have been improving the quality of the televised inspections with the 4-FACE System from Ahlberg Cameras. The latest test took place at Chinon B2 reactor. Modifications were made to best meet all requirements from EDF and the working environment."*

*A joint effort was made to meet the milestones and fulfill the demands of this important project for the fleet. As preparation, we spent two weeks for personnel training and cold trials, which gave us full confidence moving forward.*

*Our teams were trained during these two weeks to ensure the scheduled unloading. The unloading took place from July 29 to 31, with the general enthusiasm of our teams. The result of this pre-industrial trial met our expectations: high-quality images that met EDF's requirements, ensuring safety and within the set deadlines."*

Ahlberg Cameras has received feedback from the customers adopting the new 4-FACE Inspection System generation 2, and overall, it has been very good results. They like the flexibility of the system, inspection quality, durability, and the software user-friendliness. It meets our customers high standards with precision, safety, and top-notch crystal-clear images.

Looking forward to what's next!

WORKSHOP SWEDEN 21-22 AUGUST

## Ahlberg Cameras International Agent Workshop Summary.

In August, Ahlberg Cameras hosted its workshop for our agents and distributors in Norrtälje, Sweden. Agents from various markets joined the Ahlberg team members for two days of product demonstrations, sales discussions, and strategic planning.

Day 1 focused on introducing new Ahlberg products, including the MINI-RAD F30, New LED lights, and 4-FACE Inspection system generation 2 (Full HD). Participants shared market insights, discussed custom projects, and explored opportunities to enhance sales.

Day 2 featured sessions on service and maintenance, decommissioning projects, and future developments. The event concluded with a factory tour.

Looking forward having you at our next Workshop!
