

LPU410-4

POWER UNIT FOR AHL-LIGHT 1
ahlbergcameras.com/products/lights/lpu410-4

The LPU410-4 is a high-performance light power unit designed specifically for the Ahlberg Cameras LED Light AHL-LIGHT 1 that is often used in combination with an inspection camera or similar installations.

The LPU400-series offers up to 4 channels of seamlessly controllable light outputs. The outputs are controlled by front-panel-mounted control knobs. The outputs work with a constant current design, meaning that the system adapts to power loss in cables and enables the LED lights to perform with max efficiency.

MORE INFORMATION ABOUT LPU410-4

APPLICATIONS

- Power and control unit for the lights AHL-LIGHT 1

BENEFITS

- Wide band of the power supply input 120 to 240 V AC, 50/60 Hz.
- Individually controlled outputs for up to four units, or paired outputs with two units per channel for up to eight lights in total.
- Outputs are short-circuit-, over-current-, and over voltage protected.

SPECIFICATIONS

PHYSICAL CHARACTERISTICS

Width	483 mm
Length	375 mm
Height	88 mm
Weight	4.3 kg
Housing material	Powder coated aluminium

POWER

Input Voltage	120-240 VAC / 50-60Hz / 130 W
